

Health and Chronic Disease Indicators Visualization Dashboard

Project 3: Data Visualization Track

Group 2: David Cabrera | Kathy Nguyen | Anh Pham | Miguel Soriano

INTRODUCTION

Project Goals:

- Exploring trends and disparities in physical activity, obesity, and chronic disease across U.S. states
- Dashboard for informed public health decisions and understanding regional health trends using Maps and Charts

Data Sourcing & Tech Stack

CDC

Data.gov: Nutrition, Physical Activity, and Obesity Dataset

HHS

Data.gov: U.S. Chronic Disease Indicators Dataset

MongoDB

Database Storage, Data Cleaning and convert to JSON

Language

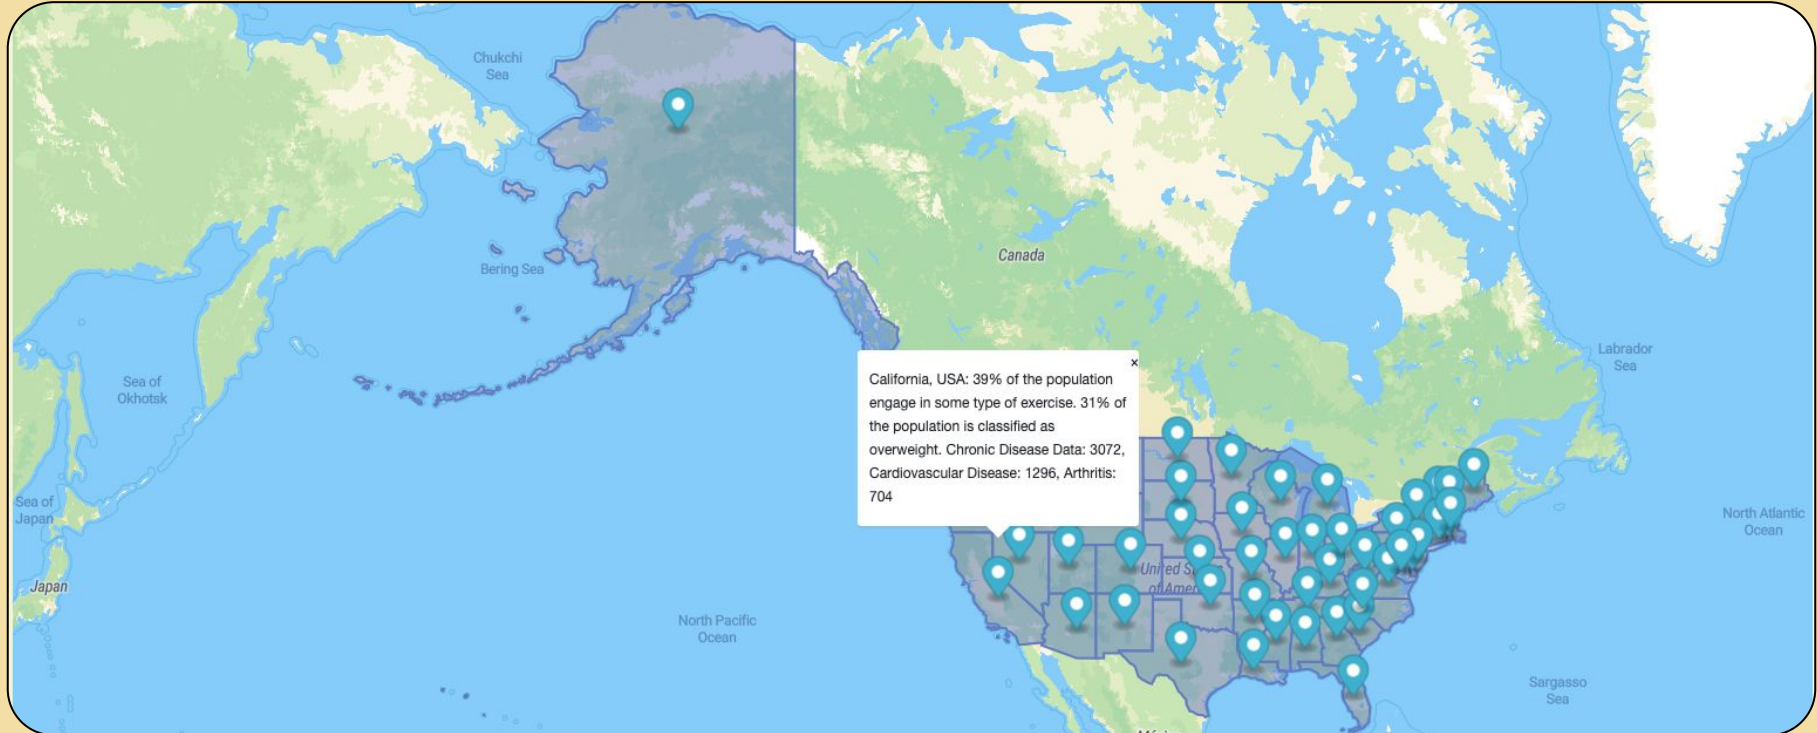

Python: Data Cleaning & Javascript and HTML: to create the webpage and server

Libraries

New: Maplibre (Map Visualization) & Chart.js (interactive charts)

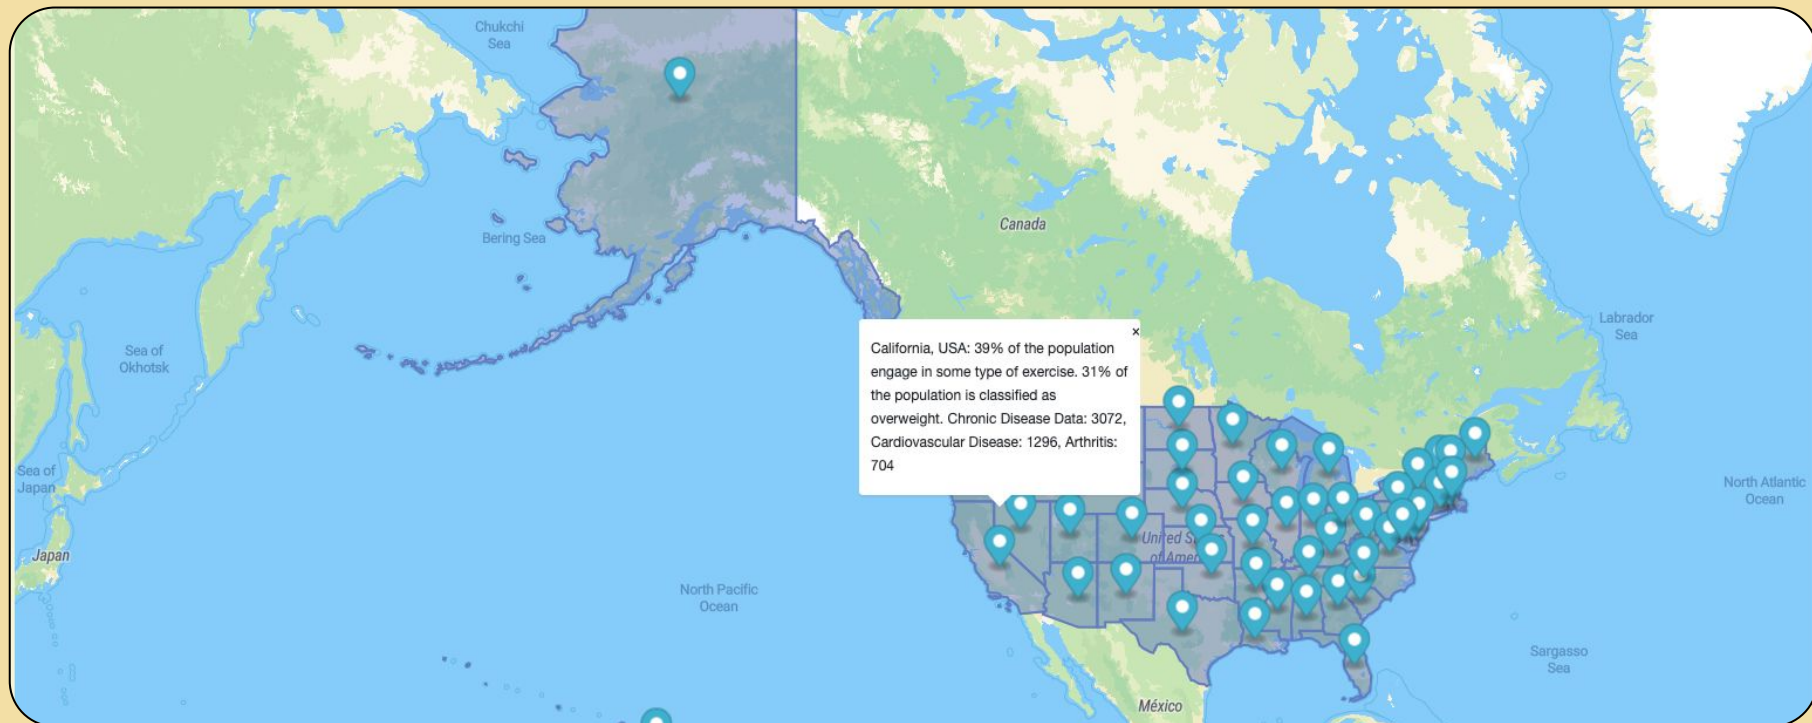

Miguel

Map Demo: Physical Activity & Obesity Statistics

Daniel

Map Demo: Chronic Disease Indicators

Anh

Bar Chart Demo: Health Statistics based on Survey Data

Select State:

Select Question:

National

Percent of adults aged 18 years and older who have obesity

Kathy

Trend Line Chart Demo: Chronic Disease Indicators

Select State:

California

Select Topic:

Diabetes

Select State:

California

Select Question:

Overweight or obesity among adults aged ≥ 18 yr

Conclusion

- Interactive 3-page dashboard: Map overview, survey data visualizations, and chronic disease insights.
- The homepage map allows users to explore state-level health stats and chronic disease indicators.
- Potential tool to inform public health decisions and promote healthier lifestyles.
